The **DynaWasher DW-1250** is used for removing oil and grease from metallic parts. It is equipped with automatic rotating table and automatic pneumatic door. The speed of the rotating table and the washing time, are adjusted from the main control panel (PLC).

DYNAWASHER DW-1250

Technical Characteristics :

- Stainless Steel
- PLC Controlled with storable programs
- Automatic Door
- Loading Trolley
- Automatic Rotating Table (1250mm. x 1250mm.)
- Working Height : 920mm
- Stainless steel water/chemical tank with filter,
- Heating elements for water heating
- Polypropylene Spraying Nozzles
- Adjustable rotating speed and washing time
- Max. working weight : 700Kg
- Electric supply : 380/400V, 50/60Hz
- Total Power : 35Kw

Dimension (mm)

| | WIDTH | DEPTH | HEIGHT |
|--------------------|-------|-------|--------------|
| Overall | 2200 | 2800 | 3000 (4200)* |
| Working dimensions | 1250 | 1250 | 920 |

(* Overall height with open door)
