The **DynaWasher DW-900** is used for removing oil and grease from metallic parts. It is equipped with automatic rotating table and automatic pneumatic door. The speed of the rotating table and the washing time, are adjusted from the main control panel (PLC).

DYNAWASHER DW-900

Technical Characteristics :

- Stainless Steel
- Automatic Door
- Automatic Rotating Table (900mm. x 900mm.)
- Max. Loading weight : 200Kg
- Loading trolley
- Stainless steel water/chemical tank with filter,
- Oil separator
- Polypropylene Spraying Nozzles
- Heating Element of 9Kw
- Stainless steel pump : 3Kw
- Rotating table motor power : 0.75Kw
- Steam extraction motor power : 0.25Kw
- Adjustable rotating speed and washing time
- Electric supply : 380/400V, 50/60Hz
- Total Power : 13Kw

Dimension (mm)

	WIDTH	DEPTH	HEIGHT
Overall	2000	2500	2000 (3000)*
Working dimensions	600	600	800

(* Overall height with open door)
